

About Me: I am an experienced computer programmer who understands the discipline necessary to build products that work, on time and within budget.

Work: With over 50 years of experience in the computer industry, my résumé is quite long. I have worked as a system programmer for the Stanford Artificial Intelligence project and for Sanders Associates, a military contractor. I worked as a Software Engineer for Digital Equipment Corporation, creating and maintaining products for a world-class computer manufacturer. For full details, [click here](#) ([./assets/Résumé.pdf](#)).

Education

- I have a Bachelor of Science in Statistics from Stanford University, class of 1967. At that time there was no undergraduate degree in computer science.
- University of New Hampshire coding boot camp, expected to complete in September, 2022.

- telephone: USA (603) 424-1188. Note that this telephone number is protected by a robocall prevention device. You must be a live person to reach me on it.
- mailing address: 20A Northwest Blvd. Ste 345 / Nashua, NH 03063-4066

Portfolio:

Horiseon

The Horiseon website features a header with "Search Engine Optimization", "Online Reputation Management", and "Social Media Marketing". Below the header, there are three main service sections: "Search Engine Optimization" (describing how SEO allows you to increase visibility and find the right customers), "Online Reputation Management" (describing how reputation management gives you control over what potential customers see when they search for your business), and "Social Media Marketing" (describing how social media marketing helps you discover which platforms are right for your brand, using analytics to find the right markets and increase your audience).

As a class exercise in the UNH coding bootcamp, we were asked to improve the accessibility of a web page, and in the process to correct minor errors and improve its maintainability. The source code is on github at
https://github.com/JohnSauter/UNH_boot01-Sauter-Horiseon
(https://github.com/JohnSauter/UNH_boot01-Sauter-Horiseon) and the web site is at
https://johnsauter.github.io/UNH_bootcam01-Sauter-Horiseon/
(https://johnsauter.github.io/UNH_bootcam01-Sauter-Horiseon/).

In the early days of the World Wide Web, if you had pages you wished to include in the web, you connected your computer to the internet and ran an http server on port 80. I continue to maintain my personal web site using a computer in my home at this URL:
<https://www.systemeyescomputerstore.co>
(<https://www.systemeyescomputerstore.co>)
